

Ariston[®]
Greek for "The Very Best"

Here at Ariston Specialties we are importers, producers, and distributors of the finest olive oils from Greece and we import the finest balsamic vinegars from Modena, Italy. We started in the spring of 1997 as a small family business, first bringing in to Connecticut cold press extra virgin olive oil that was and still is produced by our family in the Kalamata region of Greece. We later began adding balsamic vinegar from Modena, Italy. Our mission from the very beginning was to provide the American Food Market and eventually the world with premium unsurpassed oils and vinegars at an affordable price.

Since 1997, Ariston's products have been greatly received by the public. Ariston's products have been featured on the Faith Middleton Show "Food Schmooze" on NPR, [The Hartford Current](#), National Public TV has featured our products for fundraisers, and we have also been featured several times on [The Boston Globe](#) as well as the [Westchester County Magazine](#) in NY. In the winter of 2007 Ariston was featured on PBS WGBY's "Making it Here in America." Ariston's olive oil and balsamic has received several Best in Connecticut Awards from 2001-2011. Ariston's olive oil has also received in May 2008 two gold medals at the [Fort Lauderdale International Olive Oil Festival](#), a Bronze Medal in the 2008 a Silver Medal at the [2012 International Olive Oil Competition in Los Angeles](#), and was awarded "**Most Favorite**" Olive Oil at [SIAL CANADA's 2012 OLIVE d'OR Competition](#) in Montreal. In 2014 we were award the Gold Medal for our Ariston Blood Orange Infused Olive oil at the Olive Japan International Extra Virgin Olive oil Competition and a Bronze Medal for Ariston Oregano Infused Olive oil at the Los Angeles International Olive oil Competition.

We started offering the Ariston Refill and Save Program in 1997. Our Environmentally Friendly program was received well by the public as it allowed people to purchase Extra Virgin Olive oil and Balsamic Vinegar at reasonable prices. The quality of our Extra Virgin olive oil will never be compromised! Many companies offer the Refill and Save Program now but they forget that the consumer is smarter than they think. **It is not the stainless steel container that keeps the people coming back; it is what you have in there.**

2 tablespoons a day keeps the doctor away!

What does our Brand name Ariston mean?

Ariston is an ancient Greek word meaning The Very Best. It was Aristotle who said Πᾶν Μέτρον Ἄριστον meaning "moderation is the best" and this philosophy applies to one's diet and life. Extra Virgin Olive oil is not just a commodity to the Greek people. Since ancient times, olive oil is in our DNA. What drives Ariston is to share the Very Best with our customers. From Ancient Greek pagan religion to Christianity, Extra Virgin Olive oil has played a key role in various religious rites, sports and commercial activities. It was Athina's gift of the olive branch to Athens that persuaded the Gods to choose her as the possessor of the city. The ultimate award at the Ancient Olympic games was an olive branch. To us this tells us that what gold is to us today, the olive branch was to the Ancient Greeks. Olive oil was the most important commodity for the Ancient Greeks and to this day for the modern Greeks. Now that Christianity has become the major religion in Greece, Extra Virgin Olive oil is used in religious rites such as Baptism where we anoint the child with olive oil. During the dark years of the Ottoman occupation, Extra Virgin Olive oil took a major role. It was used in lamp to give light to the basements of the churches at night so that the Greek children could learn and maintain their roots. These few examples show us how interwoven the simple of juice of the olive fruit has become in our human fabric.

What Extra Virgin Olive oil means to Ariston

Extra Virgin olive oil for us is «Πολύτιμο» and like many Greek words, you must use a phrase to explain one word.

Πολύτιμο therefore is a word used to describe something of the highest value and highest honor to one's life. It is therefore this word Πολυτιμο, which drives us to provide the best possible Extra Virgin Olive oil to the everyday person. For over four generations our family has harvested olives in the hopes of producing this green gold substance we call Extra Virgin Olive oil.

What is the difference between Ariston and other Extra Virgin Olive oils?

There has been a lot of talk lately about recognizing true Extra Virgin Olive oil, unfortunately we find this to be heavily one sided in favor to those that began a smear campaign against EU EVOO's in order to gain market share and not because their quality was better. Extra Virgin Olive oil is a lot like wine in that has it's own personality and taste profile. Our Extra Virgin Olive oil, which my daughter produces in Greece, comes from one of the premier regions know for quality EVOO. Today's retailer needs to have Extra Virgin Olive oil in order to compete successfully with his competition. He needs to compete with Olive oil and Balsamic Vinegar shops that are flooding the market. By having high quality, the consumers will return again and again. The retailer will have the upper hand by having Ariston Extra Virgin Extra Virgin Olive oil and the large variety of flavors we offer. There are many companies that will sell you on the exceptional sample and provide you with less than exceptional product. Since 1997 when we first began to import Extra Virgin Olive oil to the United States, there was very little products available having the characteristics of Extra Virgin Olive oil. It was then that we help to start the revolution in what small way we could. With Ariston Extra Virgin Olive oil you will get exactly that, 100% Unadulterated Extra Virgin Olive oil. This oil is a product of our family's farms and from Co-operatives, small farmers that take pride in their trees, in their Koroneiki olives and in their Extra Virgin Olive oil. What drives us is quality, because with quality you have a friend for life but with a cheap price you have an acquaintance. To be fully transparent to our customers, we offer a chemical analysis that has been analyzed by a third party company and not by us. Through our HACCP program, we have measures into place which manage certain critical control points that prevent adulterated olive oil from entering our production line. The Extra Virgin Olive oil that goes from the olive tree to your bottle, has been tested at least three times to assure it's Extra Virgin status.

Why should I incorporate Ariston Extra Virgin Olive oil into my diet?

We all may know that the Mediterranean diet is one of the healthiest diets in the world but why? Extra Virgin Olive oil and in particular oil that is a product of monovarietal Koroneiki olives has the highest amount of naturally occurring polyphenols. Polyphenols are good antioxidants that occur naturally in the olive. In our region of Messinia Greece, our chemical analysis show to have a high polyphenol count because of our harvesting methods. We harvest the olives while they are still green (unripe) because as the olive ripens, the polyphenol count lowers. Studies have shown that a diet rich in polyphenols which include olive oil and pomegranate, help to regulate blood sugar. Our ever loving addiction to sugary foods has led to a massive increase in Diabetes. Ariston Extra Virgin Olive oil also has high amounts of vitamin E which is excellent for the cardiovascular system, the skin which is the largest organ in the body. (On cold winter nights apply Ariston Infused Orange olive oil on your hands and not only will they smell beautiful, but the skin will be soft and supple the next morning.)

Ariston not only provides a part of a puzzle to help the consumer prevent heart disease, Diabetes and Stroke, with our Infused Olive oils, we provide variety in taste. As we know if you add anything into Extra Virgin Olive oil, you can no longer call this Extra Virgin because the chemical composition has been affected. If you see other Infused Olive oils, they claim on their label "Orange Infused Extra Virgin Olive oil." At Ariston we start with Extra Virgin Olive oil (the good stuff) and Infuse flavors such as Garlic, Chili, Chocolate to give the customer variety. Just because we eat healthy does not mean we have to sacrifice taste.

Ariston throughout the world

We are extremely successful in the United States a country that has now become aware of the benefits in the use of Extra Virgin Olive oil. When we started, vegetable oil and in particular corn oil was the main source of fat. Once people tried our product through our Bulk Fusti Refill and Save Program, they discovered not only the flavor, but what true Extra Virgin Olive oil tastes like, they incorporated olive oil into their daily consumption. Today we can claim our customers have followed us for the past 17 years and when they think Ariston, they know they are getting a quality product. Because of this quality, in 17 short years we have been able to make inroads in countries such as, EU, Japan, Australia, and Canada.

How can I sell Ariston

There are several methods in selling Ariston that can efficiently reach the consumer. The time tested practice of selling pre-packed bottles can work if you have the right packaging. In our experience from trade shows and talking one to one with people, our attractive packaging compliments the excellent quality of Ariston Products. The most successful method in the United States has been our Original Refill and Save program. With profit margins of 50-60% , with the customer saving money each time they refill their bottle and when the customer reuses that same bottle you win through repeat orders, the store wins through repeat sales and great profit margins, the customer wins because they save money each time they refill, and the environment wins with less glass bottles in landfills. **Think of the repeat business when the consumer comes to your customer's store to Refill their bottle, repeat business for you, repeat business for your customer, happy consumer!** A third option of selling our products, if the Refill and Save program is not viable for your customers, is the Olive oil and Balsamic Vinegar bar concept. This has stemmed from our Ariston Refill and Save program and offers the same fustis for customers to sample first and buy the pre-packed product. This Try and Buy concept will also benefit your customers if you are the first to offer this. Rather than have product collecting dust on your expensive space, the customer becomes an active participant in their shopping experience. This will peak their curiosity and in our experience 9 times out of 10, they buy for the simple reason because they know exactly what they will bring in their kitchen. Imagine how many times we have bought a product and were disappointed. Not only does this create bad marketing for the store we bought it from, the customer loses trust. **With this concept, they will not lose your trust!** We believe these last two options will bring huge success to you and your customers and you will see your Extra Virgin Olive oil and Balsamic Vinegar sales increase. Most importantly you will have gained your customer's confidence.

Top Five Reasons Why you should choose Ariston

"I remember after the Olive harvest, my mother and father would bring home the year's oil and store it in these Stainless Steel containers. My mother would fill her bottle as she needed and this is just how we stored olive oil. I thought to myself, what a great idea to pass on. Rather than have a bottle sit on a shelf under fluorescent lights, this concept is environmentally friendly and provides the perfect condition to store Extra Virgin Olive oil."

Tom Doukas

1. By choosing our Ariston Refill and Save program you are supporting farmers not corporations.
2. Our Extra Virgin Olive oils and Balsamic vinegars are produced using modern methods and transparency to our customers is of the utmost importance to us. Both our Extra Virgin Olive oils and Balsamic Vinegars are produced in facilities that apply HACCP.
3. The fusti creates a point of curiosity to the consumer. When customers can Fill and Refill their bottles, they can be assured that they are getting a fresh product and not a bottle that has been sitting on a shelf. This means increase sales for the store and happy customers.
4. Consumers can try before they buy and with the added incentive of saving money in the processes when they refill their bottle.
5. The markup to the store is around 50% giving you the store buying power.
