

**CHARLES**VIANCIN®  
INSPIRED BY NATURE®

2023

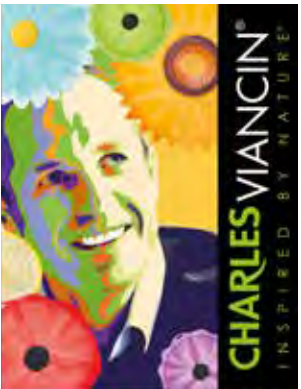

Reduce the use  
of single-use plastic wrap  
and aluminum foil  
with CV lids, fun and  
functional alternatives  
that are safe for you and  
safe for the planet.

To create my kitchen accessories,  
I started with a simple idea: nature is both beautiful  
and efficient. Inspired by nature's colors,  
materials and whimsy, my kitchen accessories  
are designed to make the everyday more beautiful,  
make life easier and reduce the use of plastic film or aluminum.  
My covers help keep food fresher longer and aid in cooking,  
reheating, anti-splattering, clean-up, and more.  
From airtight covers that are floral or mineral in design,  
to bottle stoppers with a punch, potholders with  
panache and flexible cutting boards, the pages that follow  
offer a bouquet of colorful ideas for your kitchen,  
picnics and adventures. Welcome to my world!

STOP PLASTIC,  
USE SILICONE

**FEEL  
THE  
SEAL**

**CHARLES VIANCIN®**  
INSPIRED BY NATURE®

## ECO-FRIENDLY

## A lasting and safe choice: Silicone

Plastic film fills up our garbage cans, our landfills, and our oceans. Manufacturing aluminum foil, also frequently thrown out, uses large amounts of energy. To reduce waste, we chose to use an infinitely reusable material that is also highly resistant and unbreakable: silicone. Made from silica (sand), like glass, it is food-grade quality and contains no BPA, making it healthy, hygienic, and extremely durable. Thanks to its healthy qualities, it has long been used in medical materials, childcare products, and kitchen accessories. It resists both very high and very low temperatures. The seal it creates on contact with any smooth, clean container. As silicone can also adopt any color and shape, explore our collection of unique kitchen accessories to find the perfect complement to your personality and lifestyle.
