*new and incredibly useful things*

2016

# Welcome to Dreamfarm®

Between all the steak knives, ab rollers and steam mops, there's a whole lot of junk out there huh? Thirteen years ago we thought the same thing so we decided to get into the workshop and do something different. Not knocking  people who are, but we've never been interested in designing new shapes for old ideas, that just doesn't cut it  for us. Which is why we only make something if it has never been done before, but more than that,  we'd only make something if it's actually useful.  It's amazing how hard we rack our brains  to come up with ideas that eventually seem obvious, but none of this  is rocket science. We just create clever little things  to solve the problems in life  that drive us all nuts.

The big difference with us is that our design process only starts if we can find a

problem  that needs solving, because a product  that

doesn't solve a problem is like a roast dinner without gravy – what's the point?!

If a job's worth doing,  it's worth doing properly, which is exactly why you'll never find anything half-baked in our range.  We only create things that have a reason to exist.  So whilst our range might not be the

biggest, everything we make is definitely the best. We only have one goal, and that's to create the greatest thing possible,  and if for some reason the world should end tomorrow, we'd want to be remembered  as the people who made things that just make sense.  Because, call us crazy, but this isn't just some job to us, this is our life's work.  Who are we?

We're **Dreamfarm**, and this is where clever grows.

 [dreamfarm.com/nutshell](https://www.dreamfarm.com/nutshell)

**nce upon a time in a land down under** a twenty-two year old Lego-loving-MacGyver-wannabe named Alex, took his first invention, Grindenstèin, down to the local markets to seek his fortune. As luck would have it, on that day the owner of a nearby kitchenware store happened upon Alex with his creation. **'Hooray!'** the man exclaimed, 'people have

been asking me for something that does just this, but alas, no one has ever made one. I'd love to sell these in my store!'

It was on that day in 2003 that **Dreamfarm**, the problem-solving company that **grows ideas into inventions**, was born.

Three years of selling Grindenstèins by day, and assembling them by night, would pass before Alex had gathered enough pennies to launch Dreamfarm's next big idea. **SCIZZA, THE PIZZA SCISSORS!** One great idea had grown into two, and soon inventions three and four would follow. As if by magic, Dreamfarm was now available in **OVER 500 STORES**, all of them hungry to see what nifty new things Dreamfarm would dream up next.

Meanwhile, on a cattle farm not so far away, Phil, a clever curly-haired kid who never could sit still, was finishing up design school and applied to join Dreamfarm. Alex and Phil quickly discovered they shared a rock-solid belief that **GREAT DESIGN MUST SOLVE A PROBLEM** and to be the best, you must do what has never been done before. Together they worked to invent, design, create and make their ideas into the world's best and most useful things. Like all great ideas do, Dreamfarm was growing.

Next to join the team was Cate, Alex's *never-could-keep-a-secret* sister, who would make it her mission in life to make sure the whole world knew what they were up to. A decade later, through blood, sweat, tears and Cate singing from the rooftops about their great ideas, Dreamfarm products could be found in **THOUSANDS OF STORES AROUND THE WORLD**.

These days, the team at Dreamfarm is **BIGGER**, but they still do all of their inventing and design work themselves in sunny Brisbane, Australia, and they now have **over two dozen original products to their name**. If you're ever in town, you should pop in and say **'G'day'**. Cate would love to tell you all about their latest creations, and while you'll have to do a little searching for them, somewhere out the back among all the tools and prototypes, you'll still find Alex and Phil in their workshop, tinkering away on their **never-ending search for problems that need solving**.

# Everything we design is a product of *what we stand for...*

- 1 Be the best and be original, or not at all  
*because the best do what has never been done before.*

- 2 Being different only matters when it's useful  
*because products without a purpose are junk.*

- 3 Solve a problem that's worth solving  
*because dust collectors are design failures.*

- 4 The simplest ideas are the best  
*because making sense isn't rocket science.*

- 5 Make it look as good as it works  
*make it something you'd show your mates.*

- 6 Design it to work as well after 1 or 1000 uses  
*because things that break are things that suck.*
